

# The Ashunya Advantage

**ASHUNYA**  
CUSTOMIZED FOR YOU

We Execute to Deliver!

**We truly want our customers to benefit from a "Value Add", at a competitive price and not a bargain price, where you lose credibility with your customers.**

Ashunya truly understands customers expectations and abide by it.

Ashunya is a single stop place for these processes. In today's economy, organizations take variety of steps to cut down on work force, trim the budgets constantly, trim their inventory and reduce the day sales outstanding.

All this happens due to miscommunications within various suppliers and several projects being conducted without accountability. Ashunya has been successful by utilizing our concept and Applied Knowledge through Not just Products....but with implemented Solutions.

Ashunya has the expertise to offer a full suite of solutions to satisfy your business computing requirements. Whether you need network planning and implementation, Consulting or Software Development, Configuration or working specific to a Vertical Industry, or one of a host of other services that we offer, you can have confidence with Ashunya.

**Ashunya brings the expertise and capabilities to technology so our customers can focus on what matters most to their business.**

We strive to be the reliable technology catalyst that helps businesses of all sizes and markets grow and evolve. WBENC Certified and international operating, we provide our customers with the knowledge and solutions to streamline all technological aspects of their business.

## **Single, Integrated Multiple Initiative System**

Ashunya is designed specifically to accommodate the lifecycle of customers' business processes that have unique workflows, requirements, process roadmaps, project terminology, networking, implementation, post-implementation to software development and reporting within a single integrated system.

With Ashunya, Executives gain full visibility into all projects to communicate strategic goals and track performance thus making Ashunya accountable for any products/services.

Proven solutions for Six Sigma and Enterprise Performance Improvement across your entire organization through a single source.

## Ashunya enables technology to improve business processes

Ashunya, not only has the resources, but has proven as a Valued Partner to several of its strategic partners in every aspect of supply chain networks, from procurement to IT Services, Consulting and Post Implementation Services.

Whether you need individual services, integrated products, or industry specific solutions - it's all from a single source.

## The Ashunya Portfolio

### Configured & Managed Services

Ashunya takes the worry and the thinking out of your technology by providing you with configurable hardware and software solutions that fit your business.

### Unified Communications

We bring a new approach to internal business operations and helps your company step into the modern age of telecommunications.

### Cloud & Colocation Services

Ashunya uses Cloud-based platforms to remove the physical limitations of technology while also offering colocation services to reduce in-house capital.

### Procurement Services

We remove the processing, and more importantly the trouble, with procurement to help your US or international business focus on the more important things.

### Digital Transformation Services

Ashunya can transform your digital presence with a variety of tools and optimizations that can improve how your company is seen and operates online.

### Advanced C-Suite Services

Ashunya has a suite of premium software services, which utilize SAP, Oracle, and Fullstack development, that allow companies to be leaders in their markets and allow growing businesses to shake up the marketplace.

**SAP Consulting Services** - Companies that want to grow are facing constant challenges in a fluctuating market, operational disruptions, and trying to meet their aggressive targets. No matter the industry, our SAP software experts can analyze your business and implement a SAP template that takes your business to the next level in terms of performance.

**Oracle APEX** - Oracle APEX application development is a top-tier software support option that your business cannot miss out on. From defining new data structures to visualizing data and functionality to users, our experts and your team can develop applications with low code and agile development benefits. We can then further enhance this software with Oracle REST Data Services that function off of any external data source and keeps your business growing.

**Oracle's e-Business Suite (EBS)** - Oracle's e-Business Suite (EBS) is a comprehensive suite of integrated global business software that are at your fingertips. We combine our industry and technology expertise to help implement this software suite which can impact your ROI and optimize your business operations. The EBS can focus on implementation, integration, and customization can be used to upgrade your business or maintain the multiple facets of your business, such as finance, supply chain, data, and so much more

**Fullstack Development**- Ashunya developers are experts in both front-end and back-end web and app development for every industry, allowing you to have a single-source of developers to fulfill your dreams. Our fullstack developers break down the development process to help understand your pain-points. They then utilize development languages like Java, C++, Python and even newer ones like NodeJS and React, to deliver a final software application that your company can immediately benefit from.
