

Synchronized Voice and Data Solutions

Planning for Business Continuity

Open the Door to a World of Business Communications (Data/Voice) Solutions

When you're focused on enhancing results through better, more efficient interactions among your suppliers, employees, and customers, our consulting experts can help.

Business Communication Consulting is designed to help you define the communications strategies pertinent to your real-world business imperatives. At the same time, we can help improve your return on existing technology investments and optimize business operations.

Executive Overview – Why our consults are right for you

Ashunya Consultants can guide your organization in gaining insights, creating strategies, and developing plans to help you get the most business value from your communications technology investments. We educate and advise you on the latest communication strategies that work today and are designed to meet your future needs.

Our consultants will help you validate and execute a comprehensive technology and communications strategy. They will assess your current and future communication strategy and your execution plans, then help identify and resolve potential business risk.

Benefits:

- Accelerate the effort to fully realize the value of your technology solutions.
- Extend your capabilities by learning more about technology's potential for your business.
- Leverage existing technology infrastructures.
- Integrate applications with a high degree of interoperability.
- Integrate multi-vendor solutions to provide additional services

Our business communications consulting services include but are not limited to solutions for:

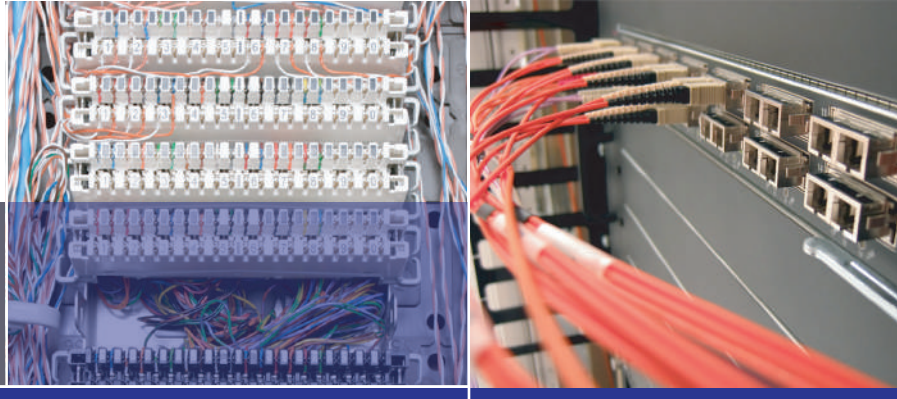

- Contact Center
- Unified Communication
- IP Telephony

Business Process Improvements

Ashunya calls on years of experience to deliver Business Communication Consulting to companies that need a trusted vendor and advisor to help them develop their strategies. Additionally, our consultants can help optimize and migrate company communications business and technical environments to next generation solutions.

We can help you build upon the services you currently offer and the technology you already have installed. By working closely with you, we are able to understand your business strategies, business needs and objectives. We will also gain an understanding of your existing systems, networks, processes and applications to help provide a technology-based solution specifically designed for your business

Use Ashunya to streamline and integrate your Business Communications Needs

Executive Benefits

Anyone who has a need for a Local Area Network, Internet Connectivity or Wide Area Networks, Phone & VoiceMail needs. Companies that place a high value on quality, reliability and customer service. Ashunya offers a very comprehensive set of integrated voice and data solutions as described below:

Voice & Data Deployment and Implementation Services Deploying and implementing networks and network enhancements are crucial to the success of your business. Ashunya understands that it is not only important what products you select but also how you will implement those products efficiently and effectively. With our various network services (project management, staging, network integration services) you can rely on Ashunya to meet your deployment and implementation goals at a price you can afford. As a result, you can optimize your technology capabilities and increase your return on your investment.

Premise Distribution

Premise Distribution is the general term used to describe the craft of cable installations in buildings. Today's network performance requirements demand careful planning and a high level of installer skill. In order to deliver an installed cable plant that meets current and projected network performance parameters, the installation staff and its management, must have both adequate training and hands-on experience.

Structured Cabling:

- Cat 5, 5e, 6 Cabling
- Cat 3 Data Cabling

Design of Structured Cable Systems

As a full service network company Ashunya can provide cable system designs for your single floor office space, multi-story building and campus environment. At Ashunya we provide excellence in design of all types of cabling projects including copper and optical fiber cable systems.

Telecommunications

When deciding what phone system you will buy and who will install it, most small-business owners don't have the luxury of dedicating individuals to manage their technology infrastructure. They need to work with a vendor whom they can rely upon for system design, consultation, and installation. Common business sense tells us that the reseller who responds to customers' pre- and post-installation needs will earn their business and long-term loyalty.

Outside Plant Cable Systems

Ashunya can provide you with quality outside plant cable system design, installations, maintenance, and emergency restoration service. Our staff is qualified for large copper pair count installations in aerial, direct burial, or conduit bank environments.

Business Technology Roadmaps:

To address immediate needs for your corporate communications environment, this service provides the tactical plan of required actions and technology alternatives. This service can be extended to provide a more detailed strategic plan that prioritizes your investments in communications infrastructure and maps them to business and financial strategies to meet your company's goals.

Ashunya Data & Voice Implementation Process, as well as our Data & Voice solutions process, consist of:

- On-Site Installation
Provides skilled personnel on multi-vendor equipment without incurring associated hiring and training costs Allows deployment of multiple networks in parallel rollouts as needed
- Remote Integration
