

# Synchronized Technology Services

Customized solutions that synchronize  
your Business Process

## **The only true solution is the one that fits your processes and needs**

We customize our solution(s) to solve your challenge(s), not the other way around. This takes listening and, more importantly, understanding what you are faced with.

Following are a few common examples that we provide customized solutions for everyday:

- A lack of IT resources to meet your needs in the areas networking, security, and turn key implementation / post implementation services. The consequence: You outsource and hire uncertified professionals, which results in less than desirable results.
- A lack of IT expertise needed to set up systems that enable you to properly service your customers (internal and external). The consequence: You acquire multiple stand-alone software applications, which results in errors, inconsistencies, delays, and redundancies across your networks.
- A lack of IT funds forces your company to choose a hardware / software solution that doesn't meet your needs. The consequence: A partial solution that doesn't fit with all of your business processes.

## **How do our solutions benefit you?**

We have the expertise to offer you a full suite of solutions to satisfy your business technology requirements. Whether you need network planning, security, implementation, post implementation, or a host of other services, you can trust Ashunya.

*"Regardless of your need, Ashunya's  
Technology Services helps you realize  
the highest degree of operational  
competency and efficiency"*

## **Executives Benefits**

With Ashunya's extensive experience in managing Network Planning and Implementation, Security Protocol Management, and Post Implementation needs like yours, we've developed information management systems that help cut costs, increase efficiency, and improve the service you provide your customers and clients – both inside and outside your organization.

## Customized solutions that synchronize your Business Process

### Business Process Improvements

Great companies like yours, recognize that information and technology are necessary ingredients to achieving business objectives in a dynamic world. Moreover, to keep pace with the growth and rapid changes in your industry, businesses like yours are demanding better processes that provide application access to many types of users, including employees, customers, and partners.

Ashunya Networks will help you protect and securely extend your applications with assured delivery over IP networks. Our service enables you to leverage your existing IT investments, while taking a phased-approach to deploying new functionality.

### Ashunya's Technology Solutions are ideal for organizations of any type, especially those with multiple users or locations.

- Small to Medium Businesses (SMB)
- Financial Services Firms
- Insurance Businesses
- Real Estate Companies
- Law Firms
- Educational Institutions
- Healthcare/Medical Companies
- Manufacturing
- Government/Defense Industries

### Portfolio of Ashunya Technology Services

Today's supply chain complexities call for a higher level of visibility, integration and information management

#### Link your Diverse Systems through Ashunya Networking

Demanding times require intelligent solutions. In today's economic climate, integrating your IT infrastructure has become a business necessity. Customers want maximum business value by enabling them to integrate, manage, and secure their e-business infrastructures and processes end-to-end.

#### Setting the Standard for Reliability and Consistency with our Implementation process

In today's competitive marketplace, flexibility, customization and reliability are key to a business success and you need a company that you can rely on especially when it comes down to your Technology Needs and Business Process.

#### Enhance the protection of your business with best-in-class security solutions

As organizations increasingly deploy network-enabled applications and information systems, measures must be taken to protect their infrastructure, applications, data, and users. The solution must integrate easily into the existing infrastructure, preserve application performance, scale, and be highly available and easy to manage.

#### Save Time, Money and Improve Productivity and Client Service with Ashunya's Help Desk

The business world today is changing and the importance of technology is increasing rapidly within that world. The one constant in the use of technology in the business world is the need for someone to keep it up and running. Beyond keeping the actual hardware and software available, users need to know how to use this technology.

### Case Study

A mid-size company expands from 50 employees to 225 employees, and needs to update their existing technology to meet their current and future needs.

#### Challenge:

Technology requirements include software integration, expansion of network, security, implementation and post implementation.

- Server Migration
- Secured internal and remote access
- Standardize existing applications and network needs to streamline employee needs based on their profile(s)
- Backups & Redundancies

#### Solution

Ashunya Technology Services evaluated the business needs and proposed a turn-key solution, by working with partners like Dell, Hewlett Packard, Microsoft, SonicWall, EMC Storage Solutions and more.

#### Results:

Ashunya Technology Services planned and implemented the solution, to meet the clients' specifications, in less than two weeks.
