

Medical Imaging

Adding Value to Patients' Lives & to the Economy

Maximizing Efficiencies and Cost Savings

Medical imaging enables health care systems to work more effectively and efficiently, while at the same time, reduces costs. In simplest terms, medical imaging enables you to replace paper processes. However, on a grander scale, medical imaging allows you to integrate patient charts with your Electronic Medical Records (EMR), and when teamed with information technology, results in a reduction of errors and inefficiencies throughout your health care delivery system.

What is the Ashunya Advantage?

- As a physician, you are able to access images and patient histories with a PDA or laptop computer from virtually anywhere in the hospital or health system.
- As a provider, you can better manage resources and data and can more easily integrate diverse departments, treatment areas, and facilities.
- Your patients in rural areas are able to enjoy the benefits of imaging expertise without traveling great distances.

How does medical imaging benefit you?

Medical imaging saves you money by reducing / eliminating Medical Records space, which frees up your existing space, enabling you to improve the effectiveness and efficiency at which you provide more integrated Health Care to your patients.

Benefits:

- Physicians can access images and patient histories with a PDA or laptop computer from virtually anywhere in the hospital or health system.
- Providers can better manage resources and data and can more easily integrate diverse departments, treatment areas, and facilities.
- Patients in rural areas can access imaging expertise via the Internet without traveling great distances.

Promising a Healthy Future

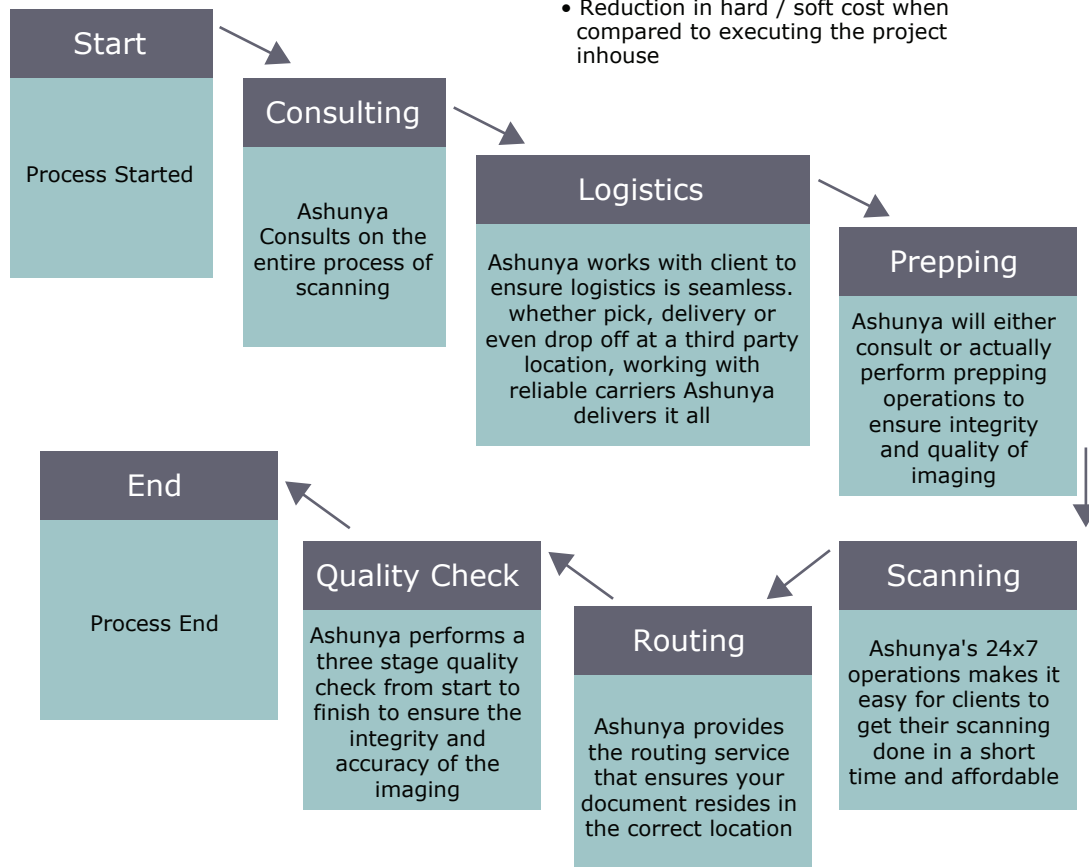

Business Process Improvements

Ashunya will help you establish a paperless environment by managing the Logistics and Back End scanning process for you, with a combination of trained & independent routers, so you can focus on serving your clientele.

Who Needs Our Service?

Doctor's offices, surgery centers, and providers with Medical Charts, who are planning to or have already set up an Electronic Medical Records (EMR) System, and are interested in a quick turn key solution at a minimal cost investment

Executive Benefits:

Ashunya has completed several scanning projects in which we scanned patient records into our EMR Software. This helped the Medical Practices become paperless in a fast and efficient manner. Some of the benefits realized by outsourcing the medical imaging / scanning process to Ashunya included:

- Pick-up and delivery of medical records, twice a week, for our local and national clients (utilizing our established Logistics capability)
- Timely completion of imaging by the due date (utilizing our seven-day-a-week operation)
- Elimination of the need for temporary employees
- Elimination of the need for training processes
- Elimination of "unproductive" office space
- Ability to offer better service to clientele
- Reduction in hard / soft cost when compared to executing the project inhouse

Case Study

Health Care Provider
Greater Valley Physician, CA

Challenge:

Greater Valley had multiple offices in LA County and it was becoming more challenging to manage these offices, due to redundancies in charts, inaccuracies, and increasing staffing costs. The practice had previously purchased an EMR, but did not know how to efficiently use the technology to receive the maximum benefit throughout their business processes.

Solution

Ashunya Medical Imaging helped the practice from concept to execution, by scanning over 25,000 charts (or 1.5 million pages) of patient records in a 90-day time frame. Ashunya helped develop a solution whereby Greater Valley accomplished prepping, scanning, and routing. In addition, Ashunya provided needed logistics services in the areas of picking up, delivering, and using certified shredding services. An accountability process was established, whereby no patient record was missed with an accuracy rate of 99.8%.

Results:

Today, Greater Valley is able to run multiple practices, as well as their hospital activities, via the Internet. Additionally, the practice realized overall costs savings by reducing their Medical Record Space to 2,500 sq. ft., enabling them to add 4 exam rooms.
