Take your Business from Reactive to Proactive

Business Process Improvement(s)

Ashunya offers Internet-based online electronic medical record and medical transcription services. We specialize in being flexible to a physician or clinic's professional needs. We offer reasonably priced, accurate and speedy medical transcription service catered to you the way you want it. Our proprietary medical transcription software, or our enterprise workflow solution Ashunya Enterprise Passport, allows you to simply send your voice files to us through the Internet with three clicks of the mouse, and we send the document back to you the next day in the same easy manner.

"In the first year our estimate was ROI of 30%. To our surprise, Ashunya Transcriptions actually saved about 45% in Cost Reduction for the overall transcription process and gaining technology, efficiency, workflow integration and immediate delivery of their dictations"

-Dr. Merry Tetef, M.D.
Oncology Center, Irvine, CA

- It synchronizes your business process with other software you use

Case Study

Main Street Specialty Surgery Center - Outpatient Surgery Center

Challenge:

A Los Angeles, CA based Surgery Center is a resource for Outpatient Surgeries committed to make a difference. More than 40 Surgeons work at this facility and attract a variety of surgeries per month. As many as 70 to 100 dictations are done at this facility that require immediate attention with utmost accuracy and reliability. Previously, the medical records would receive these transcriptions after days in the form of email, fax or even by hard copies and with no accountability in the form of reports. Whenever a staff member called to inquire about the status of a transcription, the MR had to sift through the paperwork to provide a response.

Results:

- Streamlined the dictations to their Electronic Medical Records
- First year cost savings of over 30%

Quote:

"We have an enormous number of transcriptions coming through our surgery center and it is important for us to quickly account for each of them," said Dr. Narendra Parson, Medical Director for Main Street Surgery Specialty Center.

"Ashunya Transcription Services offered us the technology and support we needed."
