S/4 HANA Services

Upgrading to SAP S/4 HANA can help your organization derive the benefits of digital economy.

However, the migration to SAP S/4 HANA is not like earlier typical SAP migration projects.

It requires a completely different way of thinking and must be planned to meet the unique challenges faced by each company.

Today, many existing SAP customers are not aware about the changes related to the new SAP S/4 HANA environment.

This makes the entire decision making and migration to SAP S/4 HANA difficult.

ASHUNYA
CUSTOMIZED FOR YOU

Where we stand apart

We follow a non-disruptive SAP S/4 HANA Migration approach ensuring a smooth transition from your existing SAP Business Suite to SAP S/4 HANA
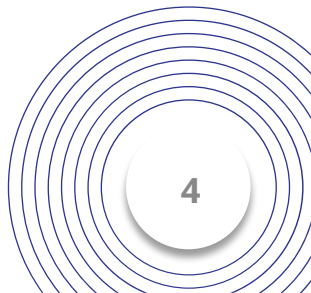

HANA Readiness Assessment

SAP HANA Migration services include:

- **Workshops**
- **Functional Assessment**
- **Technical Assessment**
- **SAP S/4 HANA code compliance & Optimization**
- **Migration:** For this we assist you in:
    - Hardware sizing, architecture and design
    - Technical Migration

HANA Readiness Assessment

Workshops & Functional assessment

- **Workshops**
  - Our HANA solution experts conduct workshops to understand your business landscape to define a comprehensive migration and solution roadmap.

- **Functional assessment**
  - Our team can conduct a technical and functional audit of your system in order to assess the HANA readiness of your existing SAP ERP environment.

HANA Readiness Assessment

Technical assessment

- Custom Code Migration is part of the system conversion process from the classic SAP Business Suite running on any database to the SAP S/4HANA system. In the context of this system conversion, custom ABAP code needs to be adapted, since a lot of SAP code within SAP S/4HANA was simplified and in some cases changed in a non-compatible way.
- Some of your custom code objects are not valid anymore and either do not perform as expected or produce syntax errors or dumps.
- In case if the existing SAP system is not UNICODE, it needs to be first upgraded to UNICODE before preparing for the SAP S/4 HANA migration. For this, all your custom developed ABAP programs also need to be UNICODE compliant.
- Automatic team can assist you in the analysis of your present development environment for UNICODE and SAP S/4 HANA readiness.

6

HANA Readiness Assessment

Code compliance/optimization & Migration

- **Code compliance & optimization**
  - Once the custom code has been analysed, Automatic team can assist you ensuring that your custom developments are properly refined in order to make them SAP S/4 HANA compliant.

- **Migration**
  - Once your existing SAP environment is assessed and prepared for SAP S/4 HANA migration, we work closely with you to ensure a trouble-free migration to the SAP S/4 HANA environment.
  - Migration services can further support you in two ways:
    - *Hardware sizing, architecture and design*
   - *Technical Migration*

HANA Readiness Assessment

Migration Services Expaced

- **Hardware sizing, architecture and design**
  - Right from the conceptualization of SAP S/4 HANA platform, SAP has worked extensively with various leading hardware vendors (for e.g. IBM, HP…) in order to not only optimize the software part but also make the best use of the technological advancements on the hardware side.
  - We can assist you in analysing your future sizing requirements and accordingly design a roadmap of future hardware architecture and requirements.

- **Technical Migration**
  - Once the preparation phase is over and the necessary hardware eco-system is in place, our technical team assists you in the actual migration of your present SAP ERP Business Suite to the SAP S/4 HANA environment.
  - We follow a multi-step migration approach covering:
    - Migration Sandbox
    - Awareness training
    - Functional check
    - Acceptance
    - Migration
  - Throughout this entire phase, our team works very closely with your internal team assisting in each step of the SAP S/4 HANA migration.

SAP Template Design and Implementation - Rollout Services

Organizations today are facing severe challenges due to the fluctuating international markets, continuous disruptions in the business models, impact on business due to internal and external factors and aggressive growth targets. Designing, implementation and subsequent global roll-out of a standardized SAP / ERP template is a major factor in order to achieve the business goals.

At Ashunya, we have a skilled and experienced team of SAP professionals with deep domain knowledge in Manufacturing, Engineering, Pharmaceutical, Healthcare and Service Industries. We have a proven track record of partnering with our customers for wider business transformation covering the entire SAP / ERP landscape.

Over the years, we have successfully executed various SAP implementations and roll out projects not only in India but across the globe.

SAP Template Design and Implementation

Our Approach and Benefits

- **Our Approach Combines:**
  - Deployment of SAP best practices
  - Partnering with our Clients to understand the existing business processes, collectively design the roadmap of implementing SAP and optimization or re-engineering of the existing processes
  - Working closely with the Stakeholders and decision makers
  - Deploy proven SAP project methodologies
  - Assure successful completion of SAP Implementation while ensuring sustainable engagement
  - Delivering desired results in terms of process improvement and data management within the organization

- **Usage of a common application software / ERP platform is of utmost importance to ensure:**
  - Value addition through successful and timely implementation of the SAP template
  - Deployment of the Industry and SAP best practices
  - Smooth integration of the new entity / entities in your existing structure
  - Enable achievement of necessary synergies
  - Ensure that the group best practices are deployed and followed in all group companies
  - Have a common data processing and reporting ERP platform
  - Usage of common master data parameters and transaction data processing procedures

SAP Upgrade & Migration Services

Looking at the growing market scenarios, business requirements and statutory regulatory requirements – SAP continuously provides SAP customers with newer patches, add-ons and versions. Depending upon the technical, infrastructure or business requirements – Company may need to migrate its SAP system landscape to a different SAP landscape.

SAP Upgrade or Migration projects are a complex activity and needs meticulous planning and professional project execution. The customers face challenges in ensuring a minimum system downtime, a smooth transition and successful upgrade / migration while making sure that the existing SAP system usage is not disturbed. This puts additional burden on the existing internal SAP manpower.

Ashunya's SAP services approach:

Engineering and Technology

Ashunya, works closely with your SAP team during the entire SAP upgrade / migration project life cycle. We follow the steps below:

- Identification of the correct SAP upgrade versions / patches / target landscape
- Detailed Project and milestone planning
- Explain the project roadmap to all the stakeholders and ensure their commitment
- Hardware sizing
- Analysis of the SAP upgrade on the existing developments (program changes / modifications)
- Operating system, database and SAP version upgrade project execution
- SPDD / SPAU modification adjustments
- Functional testing
- Key user / end user training on new version – functionalities

Advantages of Automatic's SAP Upgrade / Migration services:

- Collaborative approach to ensure professional project planning and execution
- Reduction of burden on your internal IT team
- Better calculation of time and efforts required for the project using our proven analysis tools
- Experienced team to walk through with you during the entire project life cycle
- Timely completion of the entire project ensuring readiness for the future
